Tough - Reliable - Built to Last

TFS TILT-SLIDE TRAY BODIES

TFS2000

A compact tilt tray, ideal for when **car carrying** is the primary job.

- **3 tonne maximum capacity** (with optional upgrade to 3.5 tonne)
- Suitable for installation onto cab-chassis truck with 6-8t GVM
- Body 2200mm wide
- RHS side coaming standard
- **3.8t single line pull**, planetary drive winch
- Fitted with a tow bar for extra towing capacity

TFS4000

The “work-horse” of the towing industry. Flexible enough to **carry cars or a 20ft container**. (Depending on truck capacity, wheelbase and options).

- **4 tonne maximum capacity** (with optional upgrade to 4.5 tonne)
- Suitable for installation onto a cab-chassis truck with 8- 12tonne GVM
- Standard width 2350mm (with optional **upgrade to “container body”** with hi-tensile “Hardox” floor, coamings and width 2490mm)
- **5.4t single line pull** planetary drive winch
- Optional **wheel-lift** for added towing ability

TFS6000

A versatile tilt tray combining the benefits of a longer tray with **6 tonne capacity** and the manoeuvrability of a smaller truck.

- **6 tonne maximum capacity**
- Suitable for installation onto a cab-chassis truck with 14t GVM
- **High tensile “Hardox” steel body 2490mm wide**
- **6.8t single line pull** planetary drive winch
- Optional wheel-lift for additional towing ability

EKEBOL

Tough - Reliable - Built to Last

TFS8000

A great all-rounder, ideal for **carrying equipment, containers, cars, and caravans** when needed.

- **8 tonne maximum capacity**
- Suitable for installation onto a cab-chassis truck with 16-18t GVM
- 9.0t single line pull winch
- **High tensile "Hardox" steel body** 2490mm wide
- Optional **hydraulic legs** for unloading and loading stability

TFS12

The backbone of the equipment and container moving tilt tray business.

- **12 tonne maximum capacity**
- Suitable for installation onto a cab-chassis truck with 20-24t GVM
- **9.0t single line pull winch**
(With optional upgrade to 13.6t single line pull winch)
- **High tensile "Hardox" steel body** 2490mm wide
- Optional **wheel-lift** for extra towing ability.
- Optional **hydraulic legs** for loading & unloading stability

TFS16

The heavy duty tilt tray, often used in the mining industry and in the **harshest of environments** including the jungles of New Guinea.

- **16 tonne maximum capacity**
- Suitable for installation onto a cab-chassis truck with 24-28t GVM
- **9.0t single line pull winch** (with optional 13.6t single line pull winch)
- **Hydraulic legs - standard**
- **High tensile "Hardox" steel body** 2490mm
